K-CINEPLEX CHOSE CHRISTIE CP-2220

K-Cineplex, the largest and most dynamic cinema exhibitor in Cyprus, owns 22 cinema sites in both Limassol and Larnaca and 2 in Nicosia. The same company manages and operates the entertainment centre, K-Max Entertainment, in Larnaca.

The first 5 cinema sites of K-Cineplex in Limassol were constructed in 1999 and considered to be an innovation for Cyprus, whereas on August of 2001 6 more cinema sites were constructed in Larnaca and 11 more in Nicosia a year later (in 2002). In an attempt to enhance its "investment", K-Cineplex has decided to create four (4) new 3D cinema sites, by choosing a solution that has been tested so many times in the past few years in Greece (at the cases of both Village Roadshow & Ster Cinemas); both the outcome and the success were expected and guaranteed from the beginning. As a result, K-Cineplex has assigned the project of designing, supplying and installing the 3D cinema equipment, as a whole, to Space Vision S.A.

K-Cineplex has chosen Christie CP-2220 Digital Cinema Projector for the implementation of its four new Digital 3D screens, as well as the DSS200 DOLBY cinema server and the 3D cinema system of the same company.

Space Vision, who provided and installed the equipment, successfully delivered the screens during last week and, at the same time, completed the training sections to K-Cineplex's projectionists.
